

## How Secure is your Supply Chain?

How to Secure your Supply Chain with TAPA FSR & TSR and build Resilience to remain Business Competitive

### The Situation

The Transported Asset Protection Association (TAPA) developed Facility Security Requirements (FSR) for the Supply Chain, which includes warehouse security and Truck Security Requirements (TSR) for road transportation. These were established to ensure the safe and secure in-transit and warehousing of assets through the supply chain.

FSR and TSR set the standards for the minimum best practice for storing and handling of assets and the methods for maintaining these standards.

### The Solution

LSA, approved by TAPA, can preform a Gap Assessment of your organisation's security readiness benchmarked against the TAPA 2017 FSR, Classification 'A' Standard.

This involves an onsite evaluation of the supply chain security systems already in place. We will evaluate the internal and external security infrastructure, processes like access control, personnel screening and policies and procedures.

The Gap Assessment is an initial step to gauge whether your security practices are adequate for your operations, nature of business and responsibilities to business partners and stakeholders. It will provide a foundation for the development of a supply chain security roadmap to establish practices, processes, policies and risk mitigation against the TAPA 2017 FSR 'A' compliance requirements.

Since 2008, LSA Consultants has successfully guided companies to reach compliance in the following industries:

- Private Maritime Security
- 3rd Party Logistics Providers
- Supply Chain Management
- Cargo Handling Agents
- Freight
- Forwarders
- Transportation
- Manufacturing

**By becoming TAPA FSR or TSR certified you will be united with global manufacturers, logistics providers, freight carriers, and law enforcement agencies, whose common aim is to reduce losses from the international supply chains.**

## Why choose LSA Consultants as your Enterprise Resilience consultant?

### Who can organisations rely on to implement the solution?

With our modular approach, LSA Consultants provides organisations with a flexible and effective way to help you meet your enterprise resilience goal within your resource limitations.

We are your first-choice consultants unrestrained by convention but practiced in professionalism. LSA Consultants is underpinned by its mantra of Trust, Honesty, Flexibility and Commitment.

The **SEVEN** decision points that confirm LSA Consultants is your preferred partner for Organisation Resilience:-

### 1. Demonstrated Enterprise Resilience Capability

LSA Consultants is the leader in Enterprise Resilience consultancy in Singapore with a proven track record of support to GLCs and SMEs. Our consultants are multi-disciplined with proven expertise in assisting clients across Asia Pacific to implement enterprise resilience standards for ISO/IEC 27001, MTCS, ISO 22301, ISO 31000, ISO 28000, ISO 37001, TAPA FSR, TAPA, TSR, STP and STP Plus and C-TPAT

### 2. Enterprise Resilience & Security Specialist Knowledge

Leading Asia Pacific consultants with accrued knowledge of processes, priorities, threats, risks and key documentation across the resilience spectrum to aid our clients to prepare for compliance and certification.

### 3. Professional relationship with leading Certifying bodies

LSA Consultants maintains an excellent professional relationship with all Certifying Bodies. We understand the resilience suite of management system requirements of the audit teams.

### 4. Resilience Management Systems Body of Knowledge

LSA Consultants possess a unique consolidated and contemporary body of knowledge for organisations wanting to improve their business resilience. We are subject matter experts in Information Security, Business Continuity, Supply Chain Security and Risk Management.

### 5. Business Process Efficiencies

LSA Consultants has demonstrated improved business process efficiencies and savings where losses traditionally manifest through breaches of weak business resilience controls. We understand management systems standards and how they can be implemented to improve your bottom line.

### 6. Value for Money

LSA Consultants understands budget and expenditure pressures. We work on a case by case basis to understand your financial tolerance. Each project is customised to specifically add value. Consultancy costs are fully transparent.

### 7. Absolute Commitment

LSA Consultants commits to ensure your system processes are compliant to the standards prior to any external audit. All our clients have successfully cleared their external audit and achieved certification to enterprise standards on their first attempt.
