

A Roadmap for Enterprise Resilience

How to Increase Productivity, Build Resilience and Enhance Business Continuity to Remain Business Competitive

The Situation

SME's & large corporations face a competitive and ever changing risk environment. Such risks are the subject of increased attention as part of corporate governance and enterprise risk management. The risks that propose the main concerns for businesses today are:

- Cyber attack
- Data loss or breach, deliberate or accidental
- IT & telecommunications outages
- Corruption
- Disruptions caused by terrorism, pandemics, haze or adverse weather
- Disruption to the supply chain
- Escalating costs
- Interruption to utility supply
- Security incident
- Reputational risk
- Intense competition

The realisation is that all these risks have the potential to significantly disrupt an organisation's pursuit of its mission.

With Resilience
Comes
Competitiveness

The Strategy

To survive, you must understand you business limitations, focus on the positive aspects that can arise from an undesirable environment and embrace the business opportunities it presents.

The adoption of organisation resilience standards can place your business in a unique position of strength. By confidently managing disruption risks and strengthening defences against these threats, you become a more attractive and viable commodity or service to your upstream clients.

Supply Chain Security, Business Continuity, and Information Security Management are all part of the key controls that help to mitigate the risks associated with an enterprise risk management approach. Coordinating these efforts to sustain enterprise resiliency requires a process oriented approach that can be defined, measured, and actively managed.

The implementation of such resilience standards requires a risk based approach to provide a foundation to identify, evaluate, prioritise and treat the specific resilience related risks that could impact organisations.

Safeguarding the key resilience areas of Supply Chain, Information Security and Business Continuity is key to a disruption mitigation strategy.

The Solution

The internationally recognised risk assessment guideline ISO 31000 provides the key foundation to the resilience standards that are the building blocks of organisation resilience.

Collectively, the building blocks of enterprise resilience standards together with ISO 31000 converged to improve the operational resiliency of the organisation - the ability to adapt to a changing operational risk environment.

To coordinate your efforts to sustain organisation resilience requires a process orientated approach that defines, measures and actively manages the systems through an International Standards methodology.

Organisations can easily achieve compliance to the following suite of standards underpinned by a common International risk management language:

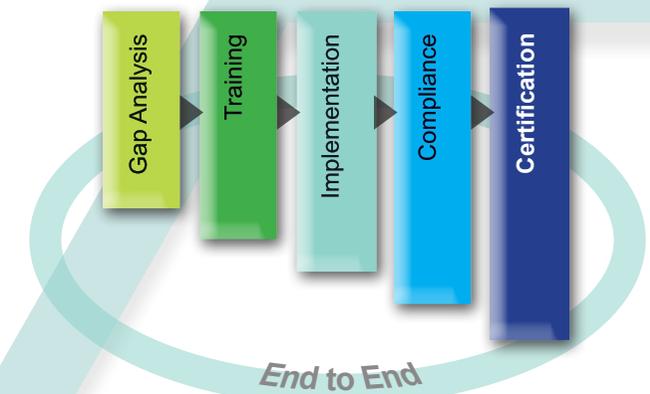

- Information Security Management System - ISO/IEC 27001:2013
- Business Continuity Management System - ISO 22301:2012
- Supply Chain Security Management System - ISO 28000:2007
- Multi-Tiered Cloud Computing Security Specification - MTCS, SS 584:2020
- Anti-Bribery Management System - ISO 37001:2016

How can you adopt such standards to improve your business resilience?

LSA can help by providing a roadmap to facilitate the implementation process. Essentially, it involves a modular approach that encompasses a gap analysis, training and consultancy.

The modular approach allows clients to choose the approach that best suits their business resources and priorities. As part of an end to end solution, LSA can also help Singapore companies who are eligible for Enterprise Singapore funding for resilience standards implementation with the funding application facilitation on a complimentary basis.

Modular and End to End Support from LSA

Why choose LSA Consultants as your Enterprise Resilience consultant?

Who can organisations rely on to implement the solution?

With our modular approach, LSA Consultants provides organisations with a flexible and effective way to help you meet your enterprise resilience goal within your resource limitations.

We are your first-choice consultants unrestrained by convention but practiced in professionalism. LSA Consultants is underpinned by its mantra of Trust, Honesty, Flexibility and Commitment.

The **SEVEN** decision points that confirm LSA Consultants as your preferred partner for Organisation Resilience:-

1. Demonstrated Enterprise Resilience Capability

LSA Consultants is the leader in Enterprise Resilience consultancy in Singapore with a proven track record of support to GLCs and SMEs. Our consultants are multi-disciplined with proven expertise in assisting clients across Asia Pacific to implement enterprise resilience standards for ISO/IEC 27001, MTCS, ISO 22301, ISO 31000, ISO 28000 and ISO 37001.

2. Enterprise Resilience & Security Specialist Knowledge

Leading Asia Pacific consultants with accrued knowledge of processes, priorities, threats, risks and key documentation across the resilience spectrum to aid our clients to prepare for compliance and certification.

3. Professional relationship with leading Certifying bodies

LSA Consultants maintains an excellent professional relationship with all Certifying Bodies. We understand the resilience suite of management system requirements of the audit teams.

4. Resilience Management Systems Body of Knowledge

LSA Consultants possess a unique consolidated and contemporary body of knowledge for organisations wanting to improve their business resilience. We are subject matter experts in Information Security, Business Continuity, Supply Chain Security and Risk Management.

5. Business Process Efficiencies

LSA Consultants has demonstrated improved business process efficiencies and savings where losses traditionally manifest through breaches of weak business resilience controls. We understand management systems standards and how they can be implemented to improve your bottom line.

6. Value for Money

LSA Consultants understands budget and expenditure pressures. We work on a case by case basis to understand your financial tolerance. Each project is customised to specifically add value. Consultancy costs are fully transparent.

7. Absolute Commitment

LSA Consultants commits to ensure your system processes are compliant to the standards prior to any external audit. All our clients have successfully cleared their external audit and achieved certification to enterprise standards on their first attempt.
